HP14-002 - In the Matter of the Application of Dakota Access, LLC for an Energy Facility Permit to Construct the Dakota Access Pipeline

Dear Ms. Van Gerpen:

Attached for electronic filing, please find the following:

1. South Dakota Association of Rural Water Systems, Inc. Post Trial Brief, and
2. South Dakota Association of Rural Water Systems, Inc. Proposed Findings of Fact and Conclusions of Law.

If you have any questions, please contact me.

Thank you.

Very truly yours,

RITER, ROGERS, WATTIER
& NORTHRUP, LLP

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF SOUTH DAKOTA**

IN THE MATTER OF THE)	DOCKET NO. HP14-002
APPLICATION OF DAKOTA ACCESS,)	
LLC FOR AN ENERGY FACILITY)	SOUTH DAKOTA ASSOCIATION
PERMIT TO CONSTRUCT THE)	OF RURAL WATER SYSTEMS, INC.
DAKOTA ACCESS PIPELINE)	POST TRIAL BREIF

COMES NOW the South Dakota Association of Rural Water Systems, Inc. (SDARWS), by and through its attorney, Margo Northrup of Riter, Rogers, Wattier and Northrup, LLP and submits this Post Trial Brief and Proposed Findings of Fact and Conclusions of Law in the above referenced matter. SDARWS is a statewide nonprofit organization that is comprised of nonprofit rural water systems, water user districts, sanitary districts and affiliated organizations. Our members provide quality drinking water to the citizens of the State of South Dakota and SDARWS is dedicated to maintaining the quality of that drinking water.

Seven of our member nonprofit rural water systems are impacted by the pipeline proposed by Dakota Access Pipeline (DAPL). The seven rural water systems are as follows: WEB Water Development Association, Mid Dakota Rural Water System, Inc., Kingbrook Rural Water System, Minnehaha Community Water Corporation, Lincoln County Rural Water System, South Lincoln Rural Water System, and Lewis & Clark Regional Water System (Lewis & Clark). Of these seven rural water systems, six have entered into agreements with DAPL to either relocate or modify their existing waterlines to accommodate the pipeline. One system has not entered into an agreement.

LEWIS & CLARK

Lewis & Clark has not entered into a crossing agreement with DAPL. The waterline at issue for Lewis & Clark is the 54 inch pipe which is the backbone of its system. It supplies

almost half of the water to the City of Sioux Falls and many of the surrounding communities. A rupture to this waterline could be catastrophic to the citizens of South Dakota.

Lewis & Clark has an exclusive easement on the property for which this crossing will take place. As Troy Larson testified to at the Trial, Lewis & Clark is very concerned that its issues are addressed by DAPL before the project proceeds. There are many engineering concerns and other concerns that need to be addressed.

In accordance with SDCL 49-41B-22, DAPL has the burden of proof to establish the facility will not substantially impair the health, safety or welfare of the inhabitants. Lewis & Clark submits that until a crossing agreement is resolved between Lewis & Clark and DAPL, DAPL cannot meet this burden of proof.

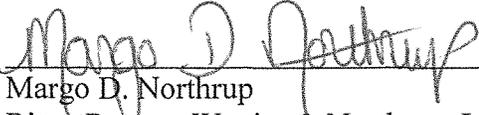

OTHER PROCEDURAL MATTERS

Another issue that arose during the course of the hearing was the insurance liability limits available to DAPL in the event of a catastrophic spill. The City of Sioux Falls made an oral Motion to Compel this information in which DAPL objected to. SDARWS formally joins in the Motion to Compel this information.

CONCLUSION

It is imperative to the citizens of the State of South Dakota that we maintain the integrity of the drinking water of South Dakota. To further this goal, SDARWS and Lewis & Clark is requesting that the DAPL permit be conditioned on DAPL entering into a signed crossing agreement with Lewis & Clark that addresses the various concerns of Lewis & Clark regarding the crossing. Lewis & Clark is further requesting that its Proposed Findings of Fact and Conclusions of Law be incorporated into a final Order.

Dated this 6th day of November, 2015.

Margo D. Northrup

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF SOUTH DAKOTA**

IN THE MATTER OF THE)	DOCKET NO. HP14-002
APPLICATION OF DAKOTA ACCESS,)	
LLC FOR AN ENERGY FACILITY)	SOUTH DAKOTA ASSOCIATION
PERMIT TO CONSTRUCT THE)	OF RURAL WATER SYSTEMS, INC.
DAKOTA ACCESS PIPELINE)	PROPOSED FINDINGS OF FACT AND CONCLUSIONS OF LAW

This matter having come on for hearing before the South Dakota Public Utilities Commission on the 29-30 of September, 2015, and 1-2 and 6-9 of October, the South Dakota Association of Rural Water Systems, Inc., appearing personally and by and through its attorney, Margo Northrup of Riter, Rogers, Wattier and Northrup, LL P and the South Dakota Public Utilities Commission having heard the testimony of the parties, received the evidence and having reviewed all records and documents on file herein and exhibits received, now makes and files the following Findings of Fact and Conclusions of Law:

FINDINGS OF FACT

1. The South Dakota Association of Rural Water Systems, Inc. (SDARWS) is a nonprofit statewide association that is comprised of nonprofit rural water systems, sanitary districts, water user districts and affiliated organizations that provide water to the citizens of South Dakota. SDARWS Exhibit 3.
2. Seven nonprofit rural water systems will be impacted throughout the State of South Dakota by the Dakota Access Pipeline (DAPL). TR 320. Six of the rural water systems have entered into crossing agreements with DAPL. Id. SDARWS Exhibit 3. Lewis and Clark Rural Water System, Inc. (Lewis & Clark) does not have a crossing agreement in place with DAPL. Id.
3. Protecting the waterlines of the rural water systems is imperative to the health and welfare of the citizens of South Dakota. TR 320.
4. Lewis & Clark will provide treated water to its member municipalities and rural water systems. When completed, Lewis & Clark will provide safe, reliable drinking water through its members to over 300,000 people in South Dakota, Iowa, and Minnesota. Lewis & Clark's member systems will use this new source of water to either replace or supplement existing sources of supply. When completed the System will distribute treated water through 337 miles of pipeline to members in a roughly 5,000 square mile area. SDARWS Exhibit 3, TR 1471-1472.
5. Lewis & Clark has 20 members, one of which is the City of Sioux Falls. TR 1484.

6. It is important to Lewis & Clark as well as all of its customers who have worked so hard in making Lewis & Clark the reality it is today, that it maintain the integrity of the rural water system for generations to come. SDARWS Exhibit 3.
7. Lewis & Clark is the sole source of water for Centerville, Beresford, Parker, Tea, Harrisburg, and Lincoln County Rural Water. TR 1476. It may be catastrophic to those communities in the event a breach occurred to the waterline. Id. Generally speaking, Lewis & Clark has one day of reserved capacity of storage in the event of an emergency. TR 1495.
8. The waterline being crossed by the proposed DAPL is the only Lewis & Clark transmission line that serves the City of Sioux Falls. TR 1485. Lewis & Clark delivers an average of 12.5 million gallons of water per day to the City of Sioux Falls. TR 1486; Sioux Falls Exhibit E.
9. Lewis & Clark delivers a little under one-half of Sioux Falls' annual water supply. TR 1487.
10. Lewis & Clark was built for two reasons, quality of life and economic development opportunities. Without the water, communities like Sioux Falls and others simply would not be able to attract the business and industry on a long-term basis like they are doing now. TR 1503.
11. Lewis & Clark will be have two crossings with DAPL, one in Iowa and one in South Dakota. TR 1461; TR 321.
12. The South Dakota crossing is near Parker, South Dakota. TR 1480; Sioux Falls Exhibit D. The crossing is on land owned by Linda and Dennis Kronaizl. TR 1493.
13. The crossing in South Dakota is of the 54-inch treated water pipeline. That line is both the aorta artery and the backbone of the Lewis & Clark System. TR 1462. It is a critical piece of infrastructure for Lewis & Clark. TR 1482.
14. The source of water for Lewis & Clark is the Missouri Elk Point Aquifer. TR 1472.
15. The 54-inch pipe in question is a quarter-inch steel with a half-inch concrete mortar lining. For its relative size, the pipe is fragile and essentially holds the shape of the surrounding bedding material. TR 1466.
16. Heavy machinery on top of the line can change the roundness of the pipeline and break the concrete mortar lining. TR 1466.
17. The water pipeline is coated to ensure it does not corrode. It is important in the engineering to make sure that the coating is in no way damaged. TR 1468.
18. The pipe also is cathodically protected, which means there is a small electrical current that goes through the pipeline that also serves as mechanism to prevent or to delay corrosion. TR 1469.
19. Lewis & Clark holds an exclusive easement in the location where the proposed DAPL crossing shall take place. TR 1463.
20. Lewis & Clark has negotiated in good faith to reach a crossing agreement with DAPL. TR 1465.

21. Lewis & Clark needs to have substantive engineering input into, and the ability to approve all of the final details of how DAPL crosses its water pipeline. TR 1471.
22. A breach of the 54-inch main waterline would be catastrophic to Lewis & Clark and its approximately 200,000 current end users. TR 1476.
23. If the crossing is not engineered properly, there could be significant problems at the crossing. TR 1477.

CONCLUSION OF LAW

1. It is imperative to maintain the integrity of the waterlines of the seven rural water systems impacted by DAPL.
2. The project will substantially impair the health, safety or welfare of the inhabitants of South Dakota if the crossing of waterlines, including the Lewis & Clark waterline, is not designed and constructed properly.
3. The DAPL permit shall be conditioned on DAPL entering into a signed crossing agreement with Lewis & Clark that addresses the various concerns of Lewis & Clark regarding of the crossing.
