415 During construction of the Project, there is likely to be a positive impact on income with an  
416 estimated \$303 million increase in labor income. Once the pipeline has been built, the yearly  
417 operations and maintenance spending will add 12 permanent jobs, approximately \$2 million in  
418 labor income, and approximately \$4 million in additional production and sales to the South  
419 Dakota economy.

420 During operations, the small number of potential permanent jobs suggests that the Project will  
421 not have long-term impact on income, occupational distribution, or cohesion of the local  
422 communities.

423 **Q. Please describe your thoughts on pipeline decommissioning.**

424 A. Sections 20:10:22:33.01 and 20:10:22:33.02 are not applicable to this Project application.  
425 However, if/when decommissioning is necessary it will be done pursuant to applicable federal  
426 and state laws at the time of decommissioning.

427 **Q. Does this conclude your testimony?**

428 A. Yes.

175 A. DAPL will design, construct, operate, and maintain the pipeline, pump stations, and valve  
176 stations in compliance with applicable zoning and county permit requirements. DAPL may  
177 request variances and/or special use permits, as necessary. DAPL recognizes the existence of  
178 South Dakota Codified Law (SDCL) 49-41B-28, regarding local ordinances and their application  
179 to the project, and reserves the right to request the Commission to invoke its provisions during  
180 the proceedings in this application should the need present itself.
