Dear Gary Hanson,

I am writing to voice my support for wind energy development. South Dakota is a national leader in wind power and we are perfectly situated to benefit from wind energy development. Wind energy adds needed jobs and pays millions in property taxes to help locally-including our schools and roads.

This is our opportunity to be a part of the future, to grow our economy, improve counties and support clean alternative energy options. Please do what you can to support wind energy.

Absolutely I support Wind Energy! The time is past where we can ignore renewable energy sources. Time to stop being stupid!

Sincerely,  
A Feywine

A Feywine,

Thank you for your message regarding wind energy development in South Dakota.

The South Dakota Public Utilities Commission has decisions pending on several requests for wind siting permits. Commissioners Nelson and Fiegen and I base our decisions on evidence presented via the docket review process, as required by law. The primary determination is whether or not the location, construction and operation of the facilities will produce minimal adverse effects on the health, safety and welfare of South Dakota's environment and citizens. These standards are provided by South Dakota Codified Laws and Administrative Rules.

Your message and this response will be posted under Comments and Responses in dockets EL19-003, EL19-007, EL19-012, and EL19-026. Here is a link to the commission's Siting Guidelines posted on the PUC's website home page and in each wind siting docket, <http://puc.sd.gov/commission/dockets/electric/2019/e119-003/e119-003sitinghandout.pdf>.
