The source of each section is included in the history note appearing in brackets at the end thereof. The absence of such a note indicates that the section was adopted for the first time with the adoption of Ordinance 2004-01.

**ARTICLE I**  
**SHORT TITLE AND APPLICATION**

**Section 101. Title.** This regulation may be known and may be cited and referred to as the "Grant County Zoning Ordinance" to the same effect as if the full title were stated. [Ord. 2004-1]

**Section 102. Jurisdiction.** Pursuant to SDCL Chapter 11-2, 1967, as amended, the provision of this Ordinance shall apply within the unincorporated areas of Grant County, South Dakota, as established on the map entitled "The Official Zoning Map of Grant County, South Dakota." [Ord. 2004-1]

**Section 103. Provisions of Ordinance Declared to be Minimum Requirements.** In their interpretation and application, the provisions of this Ordinance shall be held to be minimum requirements, adopted for the promotion of the public health, safety, morals, or general welfare. Wherever the requirements of this Ordinance are at variance with the requirements of any other lawfully adopted rules, regulations, ordinances, deed restrictions, or covenants, the most restrictive or that imposing the higher standards, shall govern. [Ord. 2004-1]

**Section 104. Purpose.**

These regulations have been based upon the Grant County Comprehensive Land Use Plan adopted by the Board of County Commissioners, and are in conformance with Chapter 11-2 of the South Dakota Compiled Laws. These regulations are designed to carry out the goals and objectives of the plan, but especially to lessen congestion in the streets; to secure safety from fire, panic and other dangers; to promote health and the general welfare; to provide adequate light and air; to prevent the overcrowding of land; to avoid undue concentration or scattering of population; and to encourage a distribution of population or mode of land utilization that will facilitate the economical and adequate provision of transportation, water, drainage, sewerage, schools, parks, or other public requirements.

These regulations have been made with reasonable consideration to the character and intensity of the various land uses and the need for public facilities and services that would develop from those uses. These regulations are necessary for the best physical development of the county. The regulations are intended to preserve and protect existing property uses and values against adverse or unharmonious adjacent uses by zoning all unincorporated land except those areas where joint zoning jurisdiction has been granted to a municipality. [Ord. 2004-1]

**Section 235b. Established Residence.** A dwelling established before the siting of a new concentrated animal feeding operation or the expansion of an existing concentrated animal feeding operation. [Ord. 2016-01]

**Section 236. Existing Farmstead.** An existing farmstead shall include a livable house occupied by the owner or tenant within the last three (3) years and shall have been existing on the site for at least five (5) years and the site shall have been used in the past as a farmstead for normal farming operation. The Planning Commission may consider defining an identifiable parcel as an existing farmstead if the proposed site meets the following criterion:

1. Evidence that the proposed site was once used for human habitation. This may be determined by existence of buildings/foundations and/or an established shelterbelt.
2. Information regarding the location of flood plain, access to roads and utilities, and other appropriate site information may be considered by the Planning Commission in determining the suitability of the parcel for development. [Ord. 2004-1]

**Section 237. Family.** One (1) or more persons related by blood, marriage, or adoption occupying a dwelling unit as a single household unit. A family may include two (2), but not more than two (2), persons not related by blood, marriage, or adoption. A family shall not include more than three (3) adults who are unrelated by blood or law. This definition shall not include foster families as regulated by the State of South Dakota. [Ord. 2004-1]

**Section 238. Farm.** An area with or without family dwelling which is used for the growing of the usual farm products, such as vegetables, fruit, trees and grain, and their storage on the area, as well as for the raising, feeding, or breeding thereon of the usual farm poultry and farm animals, such as horses, cattle, sheep and swine. The term "farming" includes the operating of such an area for one or more of the above uses, including dairy farms with the necessary accessory uses for treating or storing the produce; provided, however, that the operation of such accessory uses shall be secondary to that of the normal farming activities. [Ord. 2004-1]

**Section 238a. Feedlot.** Feedlot means pens or similar areas with dirt, or concrete (or paved or hard) surfaces. Animals are exposed to the outside environment except for possible small portions affording some protection by windbreaks or small shed type shade areas. Feedlot is synonymous with other industry terms such as open lot, pasture lot, dirt lot, or dry lot. [Ord. 2016-01]

**Section 239. Fence.** A structure used as a boundary, screen, separation, means of privacy, protection or confinement, and is constructed of wood, plastic, metal, wire mesh, masonry or other similar material and is used as a barrier of some sort. [Ord. 2004-1]

**Section 240. Frontage.** All the property on one (1) side of a street or road. [Ord. 2004-1]

**Section 240a. General Permit.** South Dakota General Water Pollution Control Permit for Concentrated Animal Feeding Operations [Ord. 2016-01]

**Section 241. Game Lodge.** A building or group of two (2) or more detached, or semi-detached, or attached buildings occupied or used as a temporary abiding place of sportsmen, hunters and fishermen, who are lodged with or without meals, and in which there are sleeping quarters. [Ord. 2004-1]

That feature is not intended to reduce noise...it is for getting a little for AEP out of the turbine

That's okay. I just wanted to understand what it was, since it is new. I'll tell everyone else there isn't any info out there.

We are trying to reduce noise, that's our goal.

Have a good day, Bob!

Good morning,

Do you have a brochure of any kind you can email for the EPCO?

I'm not having luck finding anything.

Thank you.

Yes but it has nothing to do with noise or reducing output. It helps out around the knee of the power curve

It's me again, Bob...

I found the power curve software thing we talked about in our notes... this:

*newly developed GE Enhanced Power Curve Operation ("EPCO") software technology Enhance Power Curve Operation ("EPCO") is a new software option that produces more torque at a lower rpm and slows down the overall speed of the blades which results in a quieter turbine. This does not increase the maximum output of the turbine.*

Are you aware of this option? Is it available yet?

It is not software but hardware we put on the blades to help reduce noise...it has a different power curve associated with it.

Yes a reduce output would could can the noise

Thank you, Bob. I appreciate your help.

At our recent meeting, one of the gentleman talked about new software you have developed that limits the noise. I thought he said that was called power curve. That doesn't seem like he said that correctly...that software isn't called Power Curve, is it?

Do you have information on the noise limiting software? My understanding from what was presented to us, was that it was very new. Would that be an additional charge? Would the amount of noise limited depend on the MWs or the actual turbine model?

My question involves the 2MW platform. Is a 2.3-116 turbine still available in your line up? It is being phased out so it will depend on how many and when delivery is.....

If a 2.7-116 is purchased, does it come with software that can limit the turbine to 2.3MW output? Yes

And if so, how easily could it be upgraded to a 2.7MW output at a later date? Just need to change the power curve in the SCADA. We can design for the 2.7 and then limit to 2.3mw

Let me know if you have more questions

Thanks

Bob
