

MIDAMERICAN ENERGY COMPANY
P.O. Box 778
Sioux City, Iowa 51102

SOUTH DAKOTA GAS SALES TARIFF
SD P.U.C. Section No. V
Original Issue Sheet No. 11

RULES AND REGULATIONS

5.00 Gas Service Line (Continued)

5.09 Expense of Installation - Subject to reasonable construction schedules, availability of materials, reasonable notice by the applicant, and upon application, the Company will furnish and install a gas service line of suitable capacity from its gas main to a normal meter location, satisfactory to the Company, subject to the following qualifications:

- 1) The Company's policy for installing gas service lines as defined in this paragraph (5.09), is intended to address most requests for gas service. Gas service requests that are unique in size or nature, as determined by the Company, may require an individual feasibility study to determine if the service line request can be economically justified. The basis for an economic feasibility study is defined in paragraph 3.06 of Section V.
- 2) The Company will install a gas service line not to exceed 100 feet from the property line at no cost to a new customer using gas for both space heating and water heating, and a gas line not to exceed 50 feet if the customer uses gas only for space heating, but not beyond the nearest midpoint on the side of the building (as opposed to the front or the back of the building).
 - a) If additional gas service line is requested by the customer, the Company may require the customer to make a cash non-refundable contribution in aid of construction for a gas service line in excess of the allowance provided for above.
 - b) When a customer will not be using natural gas as the primary energy source for space heating, the Company may require a non-refundable cash contribution in aid of construction.
- 3) The Company may install gas service lines without charge to serve commercial or industrial applicants where the anticipated revenues are sufficient to warrant such installation according to an economic feasibility study as defined in paragraph 3.06 or in other cases where the Company determines the conditions justify such installation.
- 4) If it is not practicable to locate the gas meter in the normal meter location and it is necessary to locate the gas meter at an alternate meter location, the customer will pay for the added gas service pipe beyond the normal meter location.
