**South Dakota Data Request**

2-4 Referring to Exhibit D of the current filing, should the supplemental payments be included in the total incentives paid when computing the benefit/cost tests for the Residential Equipment Gas Program?

**Response:**

It would be appropriate for supplemental payments to be included as incentive payments for the purpose of calculating cost effectiveness in the Residential Equipment Gas Program. However, the amount is small enough that the cost/benefit results do not change until the third significant digit of the calculation.
