Council Member
Route 1, Box 58A
White Cloud, KS 66094

Subject: Keystone Pipeline Project, Cushing Extension pursuant to Section 106 of
the National Historic Preservation Act

Dear Ms. Comer:

American Resources Group, Ltd. (ARG), has been requested by ENSR International, Fort Collins, Colorado, to conduct the cultural resources survey of the Kansas segment of the TransCanada Keystone Pipeline Project, Cushing Extension. TransCanada, pending authorization from the U.S. Department of State (DOS), is proposing to construct an approximate 1,870-mile-long crude oil pipeline extending from Hardisty, Alberta, to Patoka, Illinois. More information regarding this project can be obtained by referring to the project website at www.transcanada.com/keystone.

The Cushing Extension represents an extension of the Keystone Pipeline from a point near the Nebraska-Kansas border to Cushing, Oklahoma (see enclosed map). The Cushing Extension crosses 209.2 miles in Kansas and passes through the counties of Washington, Clay, Dickinson, Marion, Butler, and Cowley.

The purpose of this letter is to provide information on the proposed pipeline project and its location. The DOS, as the lead federal agency, will be responsible for all government-to-government consultation with Native American groups that may have an interest in portions of the proposed pipeline corridor.

A site file search and literature review has shown that the proposed Cushing Extension pipeline corridor does not cross any recognized Native American-owned land in Kansas. However, in Kansas, seven previously recorded archaeological sites are located within the corridor.

Weather permitting, ARG will begin the field investigations in Kansas in February 2007. These investigations will be carried out by two six-person crews employing

CONFIDENTIAL

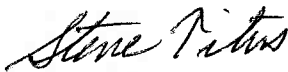

survey will be conducted within a 300-foot-wide corridor centered on the proposed pipeline centerline and will be accomplished using a variety of field techniques including systematic surface survey, systematic shovel testing, systematic walkover survey, and geomorphological and geoarchaeological investigations. All fieldwork will be confined to the area within the 300-foot-wide survey corridor.

If you have any concerns or questions regarding the project, please contact:

Elizabeth A. Orlando, Esq.

(ARG), has been requested by ENSR International, Fort Collins, Colorado, to conduct the cultural resources survey of the Kansas segment of the TransCanada Keystone Pipeline Project, Cushing Extension. TransCanada, pending authorization from the U.S. Department of State (DOS), is proposing to construct an approximate 1,870-mile-long crude oil pipeline extending from Hardisty, Alberta, to Patoka, Illinois. More information regarding this project can be obtained by referring to the project website at www.transcanada.com/keystone.

The Cushing Extension represents an extension of the Keystone Pipeline from a point near the Nebraska-Kansas border to Cushing, Oklahoma (see enclosed map). The Cushing Extension crosses 209.2 miles in Kansas and passes through the counties of Washington, Clay, Dickinson, Marion, Butler, and Cowley.

The purpose of this letter is to provide information on the proposed pipeline project and its location. The DOS, as the lead federal agency, will be responsible for all government-to-government consultation with Native American groups that may have an interest in portions of the proposed pipeline corridor.

A site file search and literature review has shown that the proposed Cushing Extension pipeline corridor does not cross any recognized Native American-owned land in Kansas. However, in Kansas, seven previously recorded archaeological sites are located within the corridor.

Weather permitting, ARG will begin the field investigations in Kansas in February 2007. These investigations will be carried out by two six-person crews employing methods that conform to the Kansas State Historic Preservation Office guidelines. The survey will be conducted within a 300-foot-wide corridor centered on the proposed

CONFIDENTIAL

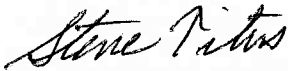

survey will be conducted within a 300-foot-wide corridor centered on the proposed pipeline centerline and will be accomplished using a variety of field techniques including systematic surface survey, systematic shovel testing, systematic walkover survey, and geomorphological and geoarchaeological investigations. All fieldwork will be confined to the area within the 300-foot-wide survey corridor.

Subject: Keystone Pipeline Project, Cushing Extension pursuant to Section 106 of the National Historic Preservation Act

To Whom It May Concern:

American Resources Group, Ltd. (ARG), has been requested by ENSR International, Fort Collins, Colorado, to conduct the cultural resources survey of the Kansas segment of the TransCanada Keystone Pipeline Project, Cushing Extension. TransCanada, pending authorization from the U.S. Department of State (DOS), is proposing to construct an approximate 1,870-mile-long crude oil pipeline extending from Hardisty, Alberta, to Patoka, Illinois. More information regarding this project can be obtained by referring to the project website at www.transcanada.com/keystone.

The Cushing Extension represents an extension of the Keystone Pipeline from a point near the Nebraska-Kansas border to Cushing, Oklahoma (see enclosed map). The Cushing Extension crosses 209.2 miles in Kansas and passes through the counties of Washington, Clay, Dickinson, Marion, Butler, and Cowley.

The purpose of this letter is to provide information on the proposed pipeline project and its location. The DOS, as the lead federal agency, will be responsible for all government-to-government consultation with Native American groups that may have an interest in portions of the proposed pipeline corridor.

A site file search and literature review has shown that the proposed Cushing Extension pipeline corridor does not cross any recognized Native American-owned land in Kansas. However, in Kansas, seven previously recorded archaeological sites are located within the corridor.

Weather permitting, ARG will begin the field investigations in Kansas in February 2007. These investigations will be carried out by two six-person crews employing methods that conform to the Kansas State Historic Preservation Office guidelines. The

CONFIDENTIAL

survey will be conducted within a 300-foot-wide corridor centered on the proposed pipeline centerline and will be accomplished using a variety of field techniques including systematic surface survey, systematic shovel testing, systematic walkover survey, and geomorphological and geoarchaeological investigations. All fieldwork will be confined to the area within the 300-foot-wide survey corridor.

Iowa Tribe of Oklahoma
RR 1 Box 721
Perkins, OK 74059

Subject: Keystone Pipeline Project, Cushing Extension pursuant to Section 106 of
the National Historic Preservation Act

To Whom It May Concern:

American Resources Group, Ltd. (ARG), has been requested by ENSR International, Fort Collins, Colorado, to conduct the cultural resources survey of the Kansas segment of the TransCanada Keystone Pipeline Project, Cushing Extension. TransCanada, pending authorization from the U.S. Department of State (DOS), is proposing to construct an approximate 1,870-mile-long crude oil pipeline extending from Hardisty, Alberta, to Patoka, Illinois. More information regarding this project can be obtained by referring to the project website at www.transcanada.com/keystone.

The Cushing Extension represents an extension of the Keystone Pipeline from a point near the Nebraska-Kansas border to Cushing, Oklahoma (see enclosed map). The Cushing Extension crosses 209.2 miles in Kansas and passes through the counties of Washington, Clay, Dickinson, Marion, Butler, and Cowley.

The purpose of this letter is to provide information on the proposed pipeline project and its location. The DOS, as the lead federal agency, will be responsible for all government-to-government consultation with Native American groups that may have an interest in portions of the proposed pipeline corridor.

A site file search and literature review has shown that the proposed Cushing Extension pipeline corridor does not cross any recognized Native American-owned land in Kansas. However, in Kansas, seven previously recorded archaeological sites are located within the corridor.

Weather permitting, ARG will begin the field investigations in Kansas in February 2007. These investigations will be carried out by two six-person crews employing methods that conform to the Kansas State Historic Preservation Office guidelines. The survey will be conducted within a 300-foot-wide corridor centered on the proposed

CONFIDENTIAL

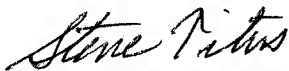

survey will be conducted within a 300-foot-wide corridor centered on the proposed pipeline centerline and will be accomplished using a variety of field techniques including systematic surface survey, systematic shovel testing, systematic walkover survey, and geomorphological and geoarchaeological investigations. All fieldwork will be confined to the area within the 300-foot-wide survey corridor.

If you have any concerns or questions regarding the project, please contact:

Elizabeth A. Orlando, Esq.
US Department of State
OES/ENV
Foreign Affairs Officer
Telephone: 202-647-4284
Fax: 202-647-1052

If you are not the appropriate individual to receive this notification, please advise me whom we should contact.

Sincerely,

Steve Titus
President
