Subject: email to moody

Hi Evan,

This is what I'm sending to moody et al let me know what you think?

Hi Mark,

Further to our conference call this afternoon, the purpose of which was to confirm the inspection process by Moody.

- **That the task is to inspect pressure vessels and must meet Code B51 ASME VIII with reference to mandatory codes ASME II, V, IX**
- **Is accountable for ensuring trained inspectors are sent out with current code and specifications**
- **Inspectors must be satisfied that code is complied to**
- **That there is no preset dollar value on the PO and that we are charged by time, distance and expenses**
- **It was noted that not all inspectors are conversant in – welding, NDE, materials and design, which you indicated we trained to the 2007 code.**

Deliverable

- **Advise scope of work for PO 267526**
- **Procedure for Pressure Vessel Inspection**
- **A competent inspector is available for inspection next week**
- **Documented proof of inspectors training**

Thanks,
Ross
