

10/25/14

I am Bonny Kilmurry, a Nebraska landowner, whose ground is being threatened by the most recent KXL proposed route in northern Holt County. I am an interested person who is raising my voice to protest the KXL permit. The South Dakota Public Utilities Commissions decision will affect the perceived standing and power of KXL and its attempt to force its pipeline through South Dakota and Nebraska. We are concerned because this pipeline's proposed route will cross our land. Your decision affects us just as it affects the people of South Dakota. Never have I been an activist or needed a cause. This fight is personal, threatening family ground owned since the 1920's. As a citizen and taxpayer, I raise my voice in protest to protect the land, water and air which is without a voice.

When we amend our ground, we add value or productivity. Adding a tarsand pipeline will not add value. It will only decrease land value and productivity, risking our livelihoods and virgin landscape.

I support South Dakota residents who are speaking against the KXL pipeline. Please do not grant this permit.
