Re: HP 14-002

Dear Commission,

I would like to express my support for the Dakota Access project. I am a new resident to the State of South Dakota from Nebraska, I have read a lot about the proposed project and feel this would be a good move for our state and our country.

This project if approved will create hundreds of jobs that will directly impact economic development, school revenues and provide landowners with additional revenue through the purchase right of ways agreements.

I would like to see this project through for the future of South Dakota, supplying our schools with dollars they need to survive.

I feel it is very important to reduce our dependency on foreign oil and I am convinced transporting through a pipeline is the safest way to do it.

Please support the project.

Thank you,

Erin Boyd
