[REDACTED] Comments:

Dear Public Utilities Commission,

The reason I have declared party status application is for the reason we have many questions and concerns about our future operation. Prior to Dakota Access even coming into sight, our family has researched how to pass the family farm on to our next generation. Some of our concerns are about any possible leaks and what is the end picture. If for any reason there would be a leak on any of our property, the oil would feed into some of our water stock dams that provide water for our stock of cattle that is proficient to our operation. I want to make sure that it is understood that we are not against this oil pipeline but have way to many concerns about the future generation following up on this process. Also what is our liability on the oil leakage into and along our drain tile line to other land owners. If a potential oil leak was to happen on our property, let it be known that at least our half section along with the next section would be impacted and all crop potentials would be devastated for many years. In our neighborhood, all creeks and streams go to the Vermillion river water shed and eventually end up in Lake Vermillion. For this reason, I ask that this project be carefully examined and maintained if passed.
