Subject: severed tile line

Eric,

Thanks for taking my late evening phone call regarding the severed 6 inch tile line which was left unrepaired yesterday by DAPL. The water that is transferred by the 6 inch tile should be transferring over to an outlet a half mile down not spilling into the trench or on to adjoining farmground. A 6 inch line with plenty of head pressure by recent rains should not have been left unrepaired yesterday.

Thanks for your help,

Charlie Johnson
