55	Based on the most recent maps by Dakota Access and flags placed in the road ditch, the
56	pipeline would enter the NW corner going to the SE corner cutting diagonally across the
57	entire farm. This area includes crop production land as well as pasture.
58	How close is the pipeline to any building, bin or pen, water source, or farming
59	facilities (i.e., storage area, feedlot, grazing area, etc.)?
60	Approximately 300 yards to the nearest building and 340 yards to the well.
61	It is planned to go under the creek which drains the watershed NW of Tea and flows into
62	the Sioux River.
63	The pipeline would cross the easement held by South Lincoln Rural Water.
64	As stated previously it would cross the grazing area.

79 Future development potential diminished due to restrictions of building on pipeline and 80 lack of desire for homeowners to live near pipeline. There is currently an existing 81 housing development $\frac{1}{2}$ mile NE of our farm, located outside of the City of Tea as well as a second development planned (zoning has been changed to agriculture/residential) 1/2 82 83 mile directly north of our farm. These developments are outside of the City of Tea growth 84 plan. Just because a particular city doesn't have these affected areas in their growth plan. 85 doesn't mean they won't be developed – unless of course pipeline easements restrict the 86 development. 87 Has your farmland been improved with drain tile? If so, please describe whether 88 89 you are concerned that pipeline construction may damage and impair the drain tile 一次,在12月前,一次增速数支援。11月1日经济数量2月,1月1日 90 performance and investment. 91 Yes, it has been drain tiled and parts of it are clay tile. I am concerned that the tile may 92 crumble by excavating the ground near it, construction equipment going over it or by 93 additional underground pressure from settling afterwards. and the second 94 95 Do you believe that the Dakota Access Pipeline will pose a threat of serious injury to 96 the environment or the inhabitants within the siting area? If so, why? 97 Yes. Ruptures, oil leaks, environmental damages in the future. As steward of the land our obligation is for also for future generations. .98 99 In February, the Wall Street Journal compared oil from 86 locations around the world and 100 found Bakken crude oil to be the most explosive. This was introduced December 11, 101 2104 in the Assembly Resolution No 191 State of New Jersey 216th Legislature. 102

103	Do you believe that the Dakota Access Pipeline will substantially impair the health,
104	safety and welfare of the inhabitants of the siting area? If so, why?
105	Watershed damage as East Beaver Creek drains the Watershed North and West of Tea
106	and flows through our farm, eventually into the Big Sioux River and then the Missouri.
107	Will eliminate the potential for future development due to people not wanting to reside
108	near an oil pipeline.
109	
110	Have you been sued by Dakota Access Pipeline to compel court ordered access to
111	your land? If so, (1) Has Dakota Access Pipeline provided you any legal authority
112	(i.e., state statute) supporting its claim that you have no right to exclude Dakota
113	Access from your land at the time of said lawsuit? and (2) Have you incurred legal
114	fees in defending against this lawsuit?
115	Yes- I have been sued.
116	No- Dakota Access has not provided any legal authority (state statute).
117	Yes-I have incurred legal fees.
118	
119	Please state any other concerns you have regarding the Dakota Access Pipeline.
120	The fact that their plan is to run the pipeline through Minnehaha and Lincoln county
121	shows total disregard for the welfare of our state, it's inhabitants and the future
122	development in the this area. I'm concerned it will lower my property value.
123	
124	Would you be available to present testimony and respond to questions during the
125	formal hearing scheduled for September 29 through October 8, 2015?
126	No.
