The land is located approximately 1/2 mile from the proposed CO2 pipeline in Lake County. The land is approximately 800 acres of nature preserve with two lakes. Because this land is so abundant with trees, water and food it is a wintering haven for the local white tail deer. At times as many as 200 to 300 white tail deer will congregate on this land. The currently proposed pipeline would cause direct and irrepreable damage to the surrounding land and wildlife should there be a disruption or breach in this high pressurized CO2 line. The CO2 pipeline poseses a danger to the envirnment, cropland and human activity surrounding this pipeline.
