petitions the Public Utilities Commission to be granted party status in the above-referenced facility permit proceeding.

Briefly explain your interest in this permit proceeding. Form is limited to 1000 characters.  
(Example: Landowner in project area).

The Summit Carbon Pipeline threatens the land and air of South Dakota, potential cultural resources and is a false solution, using unproven technology to climate change. It furthers the expansion and dependence on oil without offering real solutions to climate change and puts South Dakota at further risk of soil degradation, and pipeline explosions
