The Project is approximately 2,000 miles of pipelines for the transportation of CO2 from more than 30 ethanol plants across 5 states, including 7 ethanol plants in South Dakota, to underground injection control facilities in North Dakota. The proposed route of the mainline enters South Dakota in Lincoln County at the Iowa/South Dakota border and extends in a northwesterly direction, exiting the state at the South Dakota/North Dakota border in McPherson County. In addition to the main line, the Project includes lateral and trunk lines connecting ethanol plants throughout the eastern part of South Dakota to the main line. The proposed length of pipelines through South Dakota is approximately 469 miles and will cross the counties of Beadle, Brown, Clark, Codington, Edmunds, Hamlin, Hand, Hyde, Kingsbury, Lake, Lincoln, McCook, McPherson, Minnehaha, Miner, Spink, Sully, and Turner. The Project includes a total of 4 pump stations located in Kingsbury, Minnehaha, McPherson, and Spink counties. Applicant estimates the total cost of the Project in South Dakota to be \$785 million. The purpose of the public input meetings will be to hear public comments regarding the permit Application and the Project.
