RE: Docket #HP22-001

SD PUC Members,

We run a 4,000 head feedlot near Mellette, SD the pipeline is coming right by it plus next to my house. We don't want this coming on to are land for safety and health reasons and for crops because of the temp of the co2 at 120 degrees going through the pipeline only 4 foot deep will dry out the ground and kill crops and will not freeze in the winter time. We don't like how it is getting push on to us and not a lot of information about it early on. Armadale Farms Inc. & Armadale Limited Partnership is against the pipeline!!!!!! Thank you Doug Braun
