Dear Commission Members,

Re: Case HP 22-001

I am writing TO OPPOSE granting Summit Carbon Solutions a permit for their pipeline application in South Dakota.

My major concerns are for the waters of the eight water crossings and wind dispersal affecting people if the pipeline breaks.

Should such an instance occur, what will be Summit Carbon Solutions' legal liability to the state and persons affected?

These concerns arise out of my perusal of South Dakota's Codified Law, section 49-41B-22.3

Thank you,

Donald Hinson
resident of Pennington County
