Subject: [EXT] Summit Pipeline

I am a landowner in Lincoln County. The Summit Carbon Solutions pipeline is going through our land. I am opposed to the pipeline. I feel there should be a use for the carbon before the pipeline is installed. My understanding is it will be stored under ground.

I am also concerned about the ability of the smaller communities being able to respond to an emergency if one should occur. All emergency services are filled with volunteers.

Our land contains drain tile which I am sure many property owners have tile. I don't see how they can make sure the tile is not damaged.

Thanks for your time.
