Subject: [EXT] co2 pipeline

This ,letter pertains to the hazardous CO2 pipeline that is proposed to go thru Lincoln County. #P22-001

I oppose this dangerous pipeline for the following reasons:

- a very possible threat of serious injury or death to persons or/and environment when leakage occurs Therefore impairs the health, safety, and welfare of inhabitants of the area.

- will interfere with development of the areas. How far away must buildings etc be? people be? How many acres are taken from possible development and thereby substantially reducing value to owner.

Digging and placing of pipes disturbs the soil so crops will not do well for a large # of years causing a loss to owner/renter

- Parties asking for signing of agreement have a history of being very rude and threatening

- They do not "buy" the property simply "rent" it forever without paying any more rent or being responsible for care and upkeep

Thank You

B ennett and Luella DeJong
