Subject: [EXT] sd puc hp22-001; SCS pipeline, another Solyndra

PUC Commissioners,

The SCS pipeline is a boondoggle designed to make a small group a lot of money and pad the pockets of others for a limited time. All promises of increase tax revenue and jobs will be short-lived. There are no reports of anyone in South Dakota having been harmed by ethanol plants, and their emissions are offset by CO2 consuming and oxygen producing plant life per EPA literature. Ethanol plants built in or near our South Dakota towns have reported no health issues. Compressing CO2 and transporting it in pipelines creates a hazard. Let ethanol plants continue as is without the unnecessary high-pressures pipelines. Combustion engine use will decline and so will the need for biofuels as electric vehicles begin to dominate the transportation industry. Just use common sense here in South Dakota, don't permit this well-conceived scheme to divide our citizens. Don't make South Dakota a part of the next Solyndra fiasco.
