I'm opposed to the proposed Summit Carbon Pipeline. I feel it is not in the best interest for South Dakota or its landowners. My family was directly affected by the Dakota Access Pipeline and we were sued so they could complete their project in our state. This was a large financial burden and created large amounts of stress. It then created much damage to our land. Summit should not be able to use eminent domain for this project because it is a private company for private gain. I feel that South Dakota needs better laws and protections for its people and property against big corporations and pipelines. Please work to help the landowners. Compressing Carbon into a pipeline makes this substance dangerous if the pipe should rupture or leak. It should not be anywhere near, cities, towns, homes or livestock. All pipelines leak. My family knows this first hand. Please protect our state!
Please reject the Summit Carbon Pipeline Project.
