PUC Docket HP22-001 CO2 Pipeline

We do not want this Pipeline on our land. Please do not grant a permit to Carbon Dioxide Pipeline ventures; Carbon Solutions and/or Navigator CO2.

I find the construction of this Carbon Dioxide Pipeline disturbing and disappointing.

Disturbing from the stand point this is a dangerous and Hazardous Liquid material that has the potential to poison a Farming Community.

Disappointing because of the threat of using Eminent Domain against land owners.

There is opposition from many Farmers. I too see no Public benefit in building this kind of Infrastructure. Why would you consider this against the great people of South Dakota?

This is the kind of thing we do not need, in light of the Government's push to ban Petroleum Products and States starting to mandate not to sell Fuel powdered vehicles.
