Commissioners,

I contact you today regarding the CO2 pipeline proposed by Summit Carbon. I urge you to deny the permit request for a variety of reasons:

1. As a commissioner of McPherson county I have seen first hand the opposition from residents and landowners affected by the project. And from your public meetings you know that it's ALL counties with strong opposition not just ours.
2. The tactics being used by Summit are unbecoming any private or corporate entity. They have consistently been crass and untruthful to local residents and local government boards. This behavior is unacceptable. The threats of eminent domain and lawsuits is a bully tactic no one should be subjected too.
3. As a rural county I understand the importance of taxable infrastructure. Over the past couple of years we have had several turkey hatcheries and a hog cafo build in our county. These projects are important as they provide critical tax revenue. However Summit has come in and not asked for approval but demanded it. That's simply not how good relationships are built.

I appreciate your time and consideration in this matter. Again please deny the summit permit.

Anthony Kunz

McPherson county commissioner
