SOUTH DAKOTA PUBLIC
UTILITY COMMISSION

Sept 4 2023

Laura Tschetter

[REDACTED]
Hulebrook, SD, 57348

To Public Utilities Commission:

I am writing this letter to oppose permitting the CO₂ pipeline.

I along with million of other U.S. citizens have witnessed the squandering of billions of dollars of tax dollars on so called climate change projects. Every other day smoke fills our sky, and some days it so bad I get eye irritation and a sore throat. The idea that tax payers would subsidize a 5 billion dollar pipe line doesn't make sense. When the government can't seem to manage our forests.

As a farmer, I have been no telling for many years and so have my neighbors. We know how to properly manage the land we control.

This pipeline is a scheme to enrich certain participants in building the project. The whole climate change thing is a phase and a waste of tax dollars.

Sincerely, Laura Tschetter
