PUC Docket #(HP22-001) (Summit Carbon Solutions LLC, Petition for a Hazardous Liquid Pipeline Permit)

We are writing to express our opposition to the Summit Carbon Solutions CO2 pipeline project in SD.

We are lifelong McPherson County, SD residents and 4th generation farmers and land caretakers. Our son, daughter-in-law, and grandson are 5th and 6th generation farming along side us.

We are concerned about safety for the health of humans, livestock, and land.

We object to a hazardous material like CO2 in liquid form at great pressure pumped across any land in our great state of South Dakota.

We object to the company tactics of trying to gain permission for surveying, being told no, and still trespassing. SCS has hassled landowners with phone calls and home visits.

We object to the use of eminent domain for private company profit. It is a violation of landowners rights and freedoms.

For this project, please vote no and do not allow eminent domain.
