I'm writing to you to express my opposition to the proposed Summit Carbon Pipeline. I feel it is not in the best interest for South Dakota or it's landowners. Summit should not be able to use eminent domain for this project because it is a private company for private gain. After experience with the Dakota Access pipeline, I feel that South Dakota needs better laws and protections for its people and property against big corporations and pipelines. Years later we are still dealing with the negative effects of the pipeline and this will happen with the carbon pipeline as well. Being compressed into a pipeline, this substance is dangerous if the pipe should rupture or leak. It should not be anywhere near, cities, towns, homes or livestock. All pipelines leak. My family knows this first hand. Please reject the Summit Carbon Pipeline Project.
