Subject: [EXT] Support the Summit Carbon Solutions Project (Docket #HP22-001)

Dear SD Utilities Board members,

I am a retired farmer residing in Watertown, where I was born and raised. During my working career, I developed a potato farming operation that eventually expanded to NE, TX, CA, and several other states.

When I retired, I purchased stock in the Redfield Energy plant because I felt ethanol was important to the continued growth and sustainability of SD agriculture.

These ethanol plants need the CO2 offsets provided by the Summit Carbon Solutions pipeline to remain viable, and I strongly support their project. I believe Summit has been much more responsive to community concerns, so I hope you treat them based on their individual merits.

Sincerely,

Milt Carter
