Subject: [EXT] SCS Carbon Transport LLC Docket HP 22-001

As a Lake County landowner I wish to convey my support of the request of Summit Carbon Solutions for a pipeline for CO2 produced by local ethanol plants in South Dakota. The proposed pipeline is needed to mitigate the effects of CO2 production on climate change. Ethanol production in South Dakota has helped maintain corn prices and helped South Dakota farmers. Land prices supported by ethanol production contribute to the local property tax base that supports all South Dakotans. Mike Keppen [REDACTED] Sioux Falls SD [REDACTED]
