Subject: [EXT] PUC Docket #HP22-001

PUC Docket #(HP22-001) (Summit Carbon Solutions LLC, Petition for a Hazardous Liquid Pipeline Permit)

We are writing you as landowners and concerned citizens to show our opposition to the Summit Carbon Solutions CO2 pipeline.

We are a 3rd generation farm family and have lived in McPherson County our whole lives. Our daughter farms along with us and we hope to pass on our love of our land to more generations to come.

We are not against progress, but we are against the pumping of hazardous CO2 in liquid form across not only our land, but any land in South Dakota.

We are concerned of the health risks that this hazardous material can have on humans, animals and the land.

Insurance is another concern. Who is responsible if there ever would be a pipeline leak or break? Landowners aren't even sure that they can get insurance to protect themselves from this type of catastrophe.

Summit Carbon Solutions needs to remember that we are the landowners. It is not their land to profit from. Therefore, we oppose the use of eminent domain. This company has used many different tactics to gain permission to survey on private property, even trespassing when they were not given permission.

Please vote no and do not allow eminent domain. It is a violation of our rights as landowners.
