are you people out of your minds. this should be a non issue unless your pockets are getting lined. in that case it should be a criminal issue with all of you going to jail. i have a suggestion for you, run the damn pipeline through your yard you want it so bad. then leave the farmers alone as it seems none of you have any idea how this affects them.

Please revoke all permits and authorizations allowing the construction or use of eminent domain by a private pipeline. Current actions by the private pipelines are unconstitutional under federal law. You are taking away freedom to manage ones own property.

Dear Sir;

Please help the people of South Dakota fight for our property rights. Do not let Washington or the NWO touch our lands.

They are a threat to our great state. Please stand for the people.

Leave our Land alone. If they want to open a pipeline, Open up the Keystone Pipeline.

Please say no to this issue.

CO2 IS NOT A POLLUTANT, IT IS NECESSARY FOR LIFE ON EARTH!! THE MORE CO2 THERE IS, THE BETTER PLANTS GROW. IF YOU REMOVE IT FROM THE AIR, ALL PLANT, ANIMAL & HUMAN LIFE WILL DIE. I REMEMBER THIS FROM 7TH GRADE SCIENCE - PLANTS NEED CO2 TO CREATE OXYGEN THAT WE NEED TO BREATHE!! WHAT THE HELL IS WRONG WITH YOU PEOPLE?? YOU ALL KNOW THESE FACTS, I'M SURE - BUT THE CLIMATE SCAM GOES ALONG WITH YOUR DEPOPULATION AGENDA. WE ALL KNOW YOU (GLOBALISTS) WANT 90% OF THE EARTH'S POPULATION DEAD, AND THIS CARBON CAPTURE SHIT IS JUST ONE WAY YOU'RE TRYING TO DO IT. WE'RE NOT ALL AS STUPID AS YOU A\$\$HOLES THINK WE ARE!!

We have a National crisis on the horizon. Famine will be one of our biggest threats in America. Carbon capture is a fraud and the people know it. If you go through with this, it won't end well. Leave the farmers and other South Dakotans only and to their Constitutional rights! You are fool to follow the green agendas. You are not saving anyone, but dooming the future of all children. Stop with your insanity!

The farmers will have full liability for this pipelines failures. We are not being paid enough to have all liability on our shoulders. Carbon people are lying on many levels trying to talk farmers into this. This carbon pipeline is not needed and in the end will hurt the environment. The CEO of one such company stepped down because people realize this is a money making scam. The counties can have them lay the pipe in their ditches legally but refuse. Why? Because of the liability.
