**Subject:** RE: [EXT] HP22-001

The fact that SCS Carbon Solutions has initiated eminent domain actions against some landowners before the project is even approved by the PUC should be reason enough to reject this project. This action by SCS Carbon Solutions makes you wonder what they are not telling the public about the total impact of this project. I respectfully ask that you reject this project and I wonder if the federal subsidies were not tied to this project if it would even be considered.
