I am emailing you today to let you know that I am strongly against the Carbon Pipeline that Carbon Solutions is trying to push through in South Dakota. I am a landowner that would be affected by this. I don't feel that this is good for the environment or the people that live in the areas of the pipeline. I understand that this is coming from someone who is only looking to make a profit and really doesn't care about the people of South Dakota. Thank you for your time.
