Hi Kristie,

I am emailing you to help the cause stop the steal.

The proposed pipeline is a bad idea. Pumping CO₂ in to the ground turns the oxygen in it into carbonite. This process takes oxygen out of CO₂ and cannot be turned back into atmospheric good thing. Process happened on the planet Venus and no oxygen means no life. Bad Bad idea.

Under pressure in a pipeline CO₂'s can be deadly if there is a leak. A cloud of this stuff will kill EVERY, EVERY living thing down to bacteria. Bad, Bad idea.

CO₂ can be harvested and used for good things if handled properly. Methane gas is one example and it would not have to be piped. Why pipe it? Stated earlier this is a Bad, Bad idea.

Lastly in order to get a Bad, Bad idea going Summit Carbon Solutions is using desperate measure's and stealing land in South Dakota and calling it eminent domain it is a private company and it is not a public utility so how are they getting this thru. It is mafia tactics they are using against good hardworking people to take what they have and give it to corrupt people who have been engaged in stealing for decades some for hundreds of years. They have perfected propaganda and theft down to an art. Bad, Bad idea to support the established bureaucracy on this.

Please join the Stop the steal and not support the CO₂ pipeline.

Dan
