

ACT NOW!

CO2 private pipeline companies with foreign ties are using taxpayer dollars and eminent domain to trench dangerous, compressed CO2 pipelines through densely populated areas of South Dakota, **threatening families, land and communities – while setting an alarming precedent for the future.**

These CO2 pipelines are highly pressurized (2,100 PSI) and are plotted next to homes in rural Lincoln and Minnehaha counties, against the will of home and landowners. A CO2 pipeline rupture could be catastrophic and deadly.

Stand up for citizens' safety and rights against private gain.

1 – **Call Governor Noem @ 605.773.3212** and ask for a **Special Session** to stop CO2 pipelines.

2 – **Contact your State Senator & Representatives** and ask them to support a **Special Session**. Find your legislators @ <https://sdlegislature.gov/Legislators/Find> or use the QR code:

3 – **Sign the online petition** condemning the use of eminent domain by CO2 companies at SDpropertyrights.com or use the QR code:

Surveying is in progress without landowners' consent and land is being condemned under South Dakota's lax laws. Please act now!

Unproven Carbon Pipelines Pose a Dangerous Threat

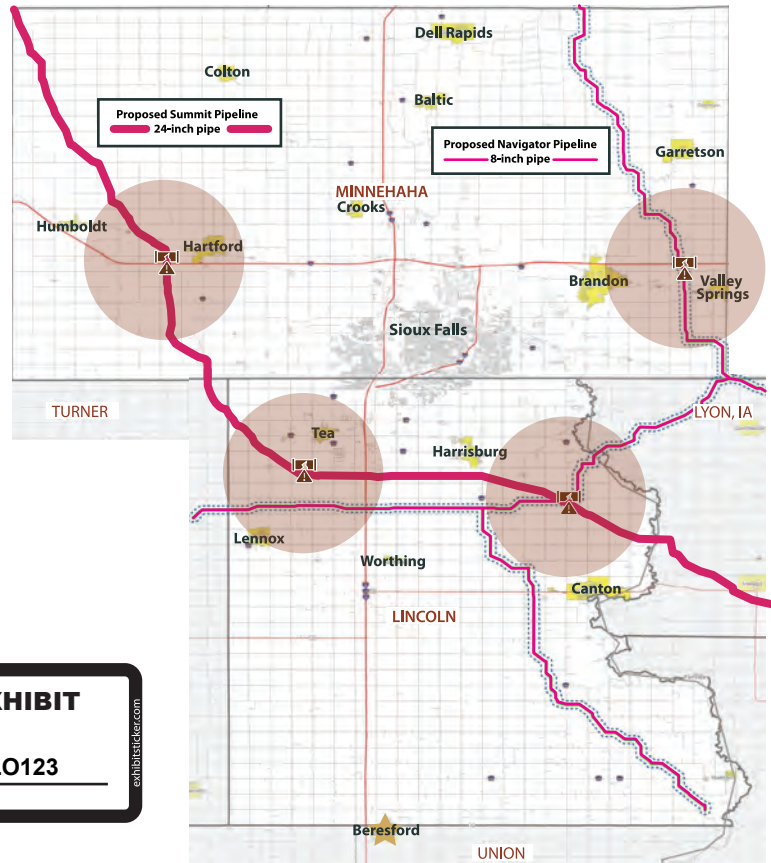

Here's what they aren't telling you.

- Proposed pipelines have never been built before—untested
- Current CO2 pipelines in the U.S., of smaller size and length, have failed and at a higher rate than other pipelines
- SD lawmakers continue to sell us out for foreign campaign backing under the guise of economic development.

Why does this matter to me?

- Foreign-backed companies push eminent domain with landowners for private gain, setting a dangerous precedent
- Review the map below. A rupture with the plume of a ~4.5-mile radius could impact several communities along either route, including you.
- Don't think so? The pipeline disaster in Satartia, Mississippi could happen here.

CO2 Pipelines – Potential Impact Area from Rupture ~4.5 mile radius*

Property Rights Roundup

Rally for a Special Session to Protect Private Property Rights

CAPITOL ROTUNDA IN PIERRE
THURSDAY, JULY 6 – NOON

Several legislators are sponsoring this event!

Please attend.

We need numbers there to show our concern!
