

Moody County, South Dakota

United States Department of Agriculture (USDA) Farm Service Agency (FSA) maps are for FSA Program administration only. This map does not represent a legal survey or reflect actual ownership; rather it depicts the information provided directly from the producer and/or National Agricultural Imagery Program (NAIP) imagery. The producer accepts the data 'as is' and assumes all risks associated with its use. USDA-FSA assumes no responsibility for actual or consequential damage incurred as a result of any user's reliance on this data outside FSA Programs. Wetland Identifiers do not represent the size, shape, or specific determination of the area. Refer to your original determination (CPA-026 and attached maps) for exact boundaries and determinations or contact USDA Natural Resources Conservation Service (NRCS).

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:20.000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Moody County, South Dakota Survey Area Data: Version 26, Sep 8, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

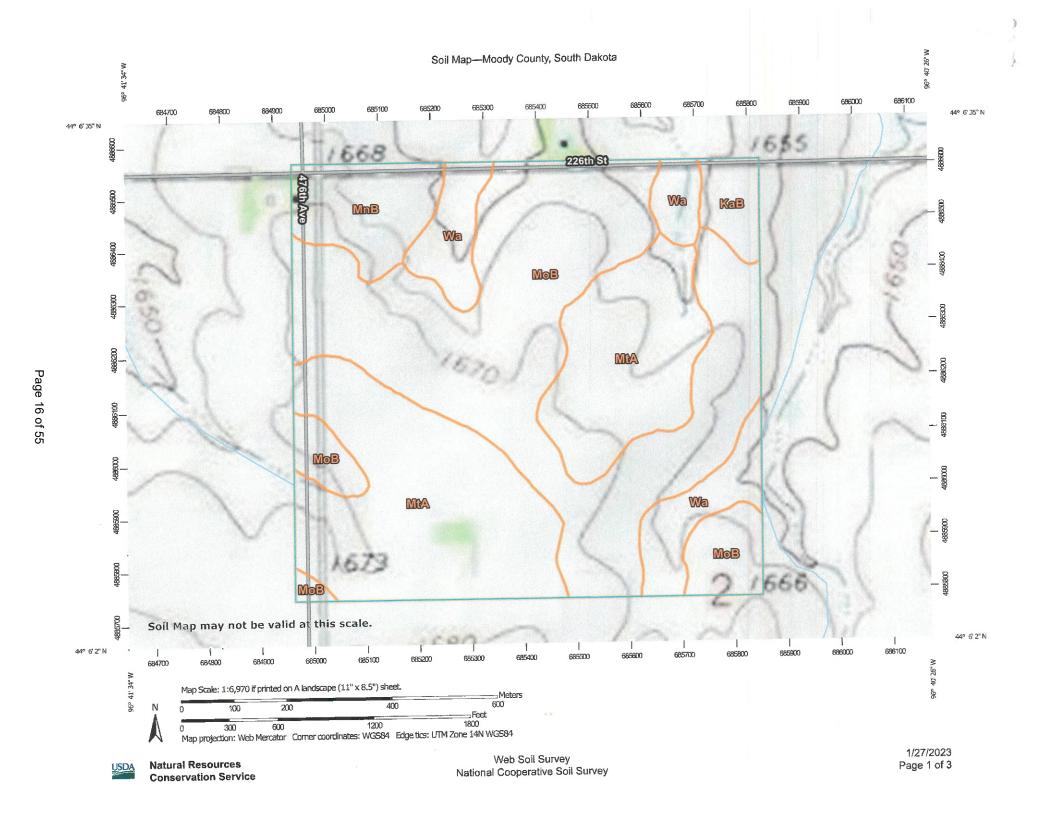

Date(s) aerial images were photographed: Jun 1, 2022—Jun 2, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

United States Department of Agriculture

Natural Resources Conservation Service 105 South Crescent Flandreau, South Dakota, 57028

December 5, 2006

Dear Ms. Beyer-LaLonde:

Enclosed is a **FiNAL Technical Highly Erodible Land and Wetland Conservation Determination**, (See attached form NRCS-CPA-026E) for land you own and/or operate. This final determination was made in response to your request for our office to make a field visit concerning the Certified Wetland Determination that was made on a portion of Tract 1515.

On November 17, 2006, a field review was conducted to further confirm the findings contained in the Certified Wetland Determination listed above. One wetland was identified on this portion of Tract 1515.

Section I of the attached NRCS-CPA-026E contains a complete list of fields considered highly erodible land (HEL). In order to maintain USDA program eligibility, you will need to farm the HEL fields following an approved conservation plan.

Section II of the NRCS-CPA-026E contains a complete list of wetlands that have been identified and will be used to determine eligibility for USDA programs. Please refer to the Wetlands Explanation section to determine the conditions under which these areas may be cropped and alterations maintained. If you plan to alter any type of wetland you should notify our office (NRCS) well in advance of starting the alteration. In this way, your plans may be reviewed so you have full knowledge of the potential effect the alterations will have on your USDA program eligibility and benefits. Restricted wetland alterations include: maintaining, improving, or installing drainage systems, removing trees and shrubs, dredging, leveling and placing fill material in wetlands, or any other activities that impair wetland functions and values.

This final technical determination is valid for USDA and Clean Water Act (CWA) purposes only. This is not a County Drainage Permit nor a US Army corps of Engineers 404 Permit, which may also be required. You will be responsible for complying with other federal, state, and local regulations as they apply to altering wetlands and drainage flows. Contact the appropriate agencies for more information.

If you do not agree with this **final technical determination**, you will have 30 days to appeal. If you chose to appeal, you should state the reasons for your appeal and furnish factual information why you believe the determination is wrong and mail your appeal to: County Committee, Moody County Farm Service Agency, 105 South Crescent, Flandreau, SD. 57028. If the County Committee sees merit in the appeal, they may refer it to the NRCS State Conservationist for a technical determination before they issue a decision. When this determination is considered final and if it includes certified wetlands, they will be added to the public list of certified wetland determinations maintained at the Farm Service Agency. If you have any questions regarding this matter, please contact me at (605) 987-2624.

Sincerely,

Joel Curran, District Conservationist

Section 1 - mighty producte Pana

Is a soil survey now available for making a highly erodible land determination? Are there highly erodible soil map units on this farm?

Fields in this section have undergone a determination of whether they are highly erodible land (HEL) or not; fields for which an HEL Determination has not been completed are not listed. In order to be eligible for USDA benefits, a person must be using an

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:20,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Moody County, South Dakota Survey Area Data: Version 26, Sep 8, 2022

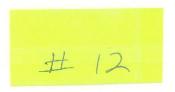

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 1, 2022—Jun 2, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

United States Department of Agriculture

Natural Resources Conservation Service 105 South Crescent Flandreau, South Dakota, 57028

December 5, 2006

Dear Ms. Bever-LaLonde:

Enclosed is a FINAL Technical Highly Erodible Land and Wetland Conservation Determination, (See attached form NRCS-CPA-026E) for land you own and/or operate. This final determination was made in response to your request for our office to make a field visit concerning the Certified Wetland Determination that was made on a portion of Tract 1515.

On November 17, 2006, a field review was conducted to further confirm the findings contained in the Certified Wetland Determination listed above. One wetland was identified on this portion of Tract 1515.

Section I of the attached NRCS-CPA-026E contains a complete list of fields considered highly erodible land (HEL). In order to maintain USDA program eligibility, you will need to farm the HEL fields following an approved conservation plan.

Section II of the NRCS-CPA-026E contains a complete list of wetlands that have been identified and will be used to determine eligibility for USDA programs. Please refer to the Wetlands Explanation section to determine the conditions under which these areas may be cropped and alterations maintained. If you plan to alter any type of wetland you should notify our office (NRCS) well in advance of starting the alteration. In this way, your plans may be reviewed so you have full knowledge of the potential effect the alterations will have on your USDA program eligibility and benefits. Restricted wetland alterations include: maintaining, improving, or installing drainage systems, removing trees and shrubs, dredging, leveling and placing fill material in wetlands, or any other activities that impair wetland functions and values.

This final technical determination is valid for USDA and Clean Water Act (CWA) purposes only. This is not a County Drainage Permit nor a US Army corps of Engineers 404 Permit, which may also be required. You will be responsible for complying with other federal, state, and local regulations as they apply to altering wetlands and drainage flows. Contact the appropriate agencies for more information.

If you do not agree with this final technical determination, you will have 30 days to appeal. If you chose to appeal, you should state the reasons for your appeal and furnish factual information why you believe the determination is wrong and mail your appeal to: County Committee, Moody County Farm Service Agency, 105 South Crescent, Flandreau, SD. 57028. If the County Committee sees merit in the appeal, they may refer it to the NRCS State Conservationist for a technical determination before they issue a decision. When this determination is considered final and if it includes certified wetlands, they will be added to the public list of certified wetland determinations maintained at the Farm Service Agency. If you have any questions regarding this matter, please contact me at (605) 987-2624.

Sincerely,

Joel Curran, District Conservationist
