April 29, 2009

This is in response to your request for a **Certified Wetland Determination** as part of your HELC/WC Certification referral, (AD-1026 form), dated 4-24-09, that we received from the Lincoln County Farm Service Agency (FSA) office. Enclosed is a Highly Erodible Land and Wetland Determination, form NRCS-CPA-026E, and attached map(s) for land you own or operate. Please refer to the attached wetland map for drainage system and wetland locations. If you are unfamiliar with the drainage systems certified by scope and effect on this property, please stop by our office to review this information.

Farm No. Tract No.

Section I of the NRCS-CPA-026E provides you with a determination of whether the fields listed are **Highly Erodible Land (HEL)**, marked "Y" for yes, or not, marked "N" for no. In order to maintain USDA program eligibility, you will need to farm the HEL fields following an approved conservation plan.

Section II of the NRCS-CPA-026E describes wetlands that have been identified and will be used to determine eligibility for USDA programs. Please refer to the Wetland Explanation section to determine the conditions under which these areas may be cropped and the alterations maintained.

The proposed tile work as drawn in green on the FSA map will not affect a "W", "FW" or "FWP" wetland and is not subject to USDA program restrictions. The tile as proposed may be replaced, maintained or improved without jeopardizing USDA program eligibility.

This **Certified Wetland Determination** has been conducted for the purpose of implementing the wetland conservation provisions of the Food Security Act of 1985 as amended. This determination may not be valid for identifying the extent of the US Army Corps of Engineer's (COE) Clean Water Act jurisdiction for this site. If you intend to conduct any activity that constitutes a discharge of dredged or fill material into wetlands or other waters, you should request a jurisdictional determination from the local office of the COE in Pierre, SD at (605) 224-8531 prior to starting the work.

This determination is neither a County Drainage permit nor a COE 404 permit, which may also be required. You are responsible for complying with other federal, state, and local regulations as they apply to altering wetlands and drainage flows. You are also responsible to make all necessary arrangements with other landowners affected by your proposed actions should you choose to proceed. If you plan to alter any wetlands, by maintaining, improving, or installing new drainage, removing trees, or placing fill material in any wetlands that is not addressed in this determination, you should notify our office (NRCS), well in advance of starting the alteration so the work can be completed with the full knowledge of it's potential effects on your USDA program eligibility.

After the 30 days have passed and/or you have a final technical determination, you will have 30 additional days to appeal to the FSA County Committee at the following address: Lincoln County Farm Service Agency, 801 E. 5th St. Suite 1, Canton, SD. 57013 or you may appeal to the National Appeals Division (NAD) at NAD Western Regional Office, 755 Parfet Street, Suite 494, Lakewood, Colorado, 80215-5506. If you appeal to the County Committee and they see merit in the appeal, they may refer it to the NRCS State Conservationist for a technical determination before they issue a decision. When this determination is considered final and if it includes certified wetlands, they will be added to the public list of certified wetland determinations maintained at the FSA office.

If you have any questions regarding this matter, please contact our office at (605) 987-2624, Ext. #3.

Sincerely,

Nyle Herbener / WJB

Nyle Herbener, District Conservationist
