

I am interested in party status for the HP24-001 docket because I have the following concerns:

1. In the event of a rupture it could impact my grandchildren who go to school in Harrisburg, SD which is within 2.5 miles of the pipeline route.
2. I understand SCS has bought up Navigator's easements. We live within ¼ mile of that pipeline route.
3. I am concerned about the excessive use of electricity & water this project will need. We use the Sioux Valley Energy & Big Sioux Water systems and this project may put a huge strain on those resources and cause outages and cost increases.
