

**I am concerned about SCS's proposed CO2 pipeline for several reasons. 4 of these reasons are below.**

**1-We have adult children/family that live within 3 miles and their school-aged grandchildren attend school at a location that is 2.5 miles from the proposed pipeline**

**2-I have personal safety concerns as well as for our environment, proper emergency response, and excessive funding this will cost the local governments over time.**

**3-I am concerned about the excessive use of resources including but not limited to water and electricity. We are down stream of the water flow.**

**4-I understand that Summit has purchased easements from Navigator. The Navigator line was planned to be ¼ mile from our home.**
