

I would like to share what Summit has done to me physically and mentally.

The original route was 300' from our house and Z700' from our Hunter house, and was on five quarters of our land. The original route has not been discarded the new route is still 50' from our land. It's on land owned by local Hutterites, who allow underage kids to operate their heavy equipment and semis, so they will more than likely breach the pipeline. Who will pay the damage on our land or for health issues we may encounter?

Summit and their disregard for our way of life has caused me untold amounts of stress. We have been fighting Summit for 3 or 4 years now, ever since we received condemnation papers signed by none other than Brett Koeneke.

My husband worked very hard to put his land together to be able to earn a comfortable living, Summit and Brett Koeneke and all the others who have been bought off (in part with MY tax dollars) are trying to destroy our life.

First the stress caused anxiety and panic attacks, so I saw a therapist and am on anxiety pills.

Then I begged my husband to buy a lake cabin five miles away (a bug-out house) to get out of the kill zone.

In the fall of 2023, I got really sick and went to ER. Turns out because of stress, my small intestine had looped and caused a blockage. I had surgery to remove 4" of my small intestine that had died. The surgeon told me if I hadn't come in when I did, it would have killed me.

It's hard for me to comprehend people who have no problem destroying other people's lives. How do they justify doing that just for money?

All of the above has not destroyed me, it has caused me to be more determined and fight harder.
