

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF SOUTH DAKOTA

This form is only for persons who wish to be an active party in this docket. You do NOT need to be a party to submit comments.

In the Matter of the Application by SCS Carbon Transport LLC for a Permit to Construct a Carbon Dioxide Transmission Pipeline

APPLICATION FOR PARTY STATUS

HP24-001

Sharon Telkamp

petitions the Public Utilities Commission to be granted party status in this proceeding.

(Name of Applicant. This will be the person or entity named as a party.)

Place a check mark next to each item below that applies to you, adding a mileage number where requested.

X I am a person or organization that received official notification of the project via U.S. mail from the siting permit applicant.

X I reside within 1/4 miles of the proposed project.

Residential address if different from your mailing address:

I own land within miles of the proposed project.

Legal description: W 225' of N 387.2' N 1/2 NE 1/4 Sec 24-109-50

I officially represent a municipal, city, township, county or other affected governmental agency within miles of the proposed project.

Explain your interest in applying for party status below.

See attached

Deadline: This application must be filed with the Public Utilities Commission on or before 5:00 p.m. CT, Jan. 24, 2025. File this completed form electronically at puc.sd.gov/EFilingOptions.aspx

This section is to be completed by the person requesting party status. All fields are required.

The proposed pipeline route surrounds my residence on the north and west side within 750'. The negative impacts will be immediate and continue into the future.

1. First, and foremost, is serious injury to the health of people living near the pipeline. The PHMSA determined updated safety standards should be drafted after the pipeline rupture in Satartia, MS. PHMSA has yet to publish the updated safety standards. SCS has not provided plume models. Local volunteer first responders will require extensive training and equipment to enable response. This will be an on-going expense for training, special equipment, etc. for new volunteers each year. These annual expenses will be the burden local taxpayers.
2. Immediate and long-term serious impact. Property and land owners receive no financial gain from the pipeline. Property values will be impacted and resale opportunities will be diminished. Future business and development opportunities will be limited. My property is currently in the city/county joint jurisdiction, with new residential developments within two miles. Property and liability insurance will be difficult to obtain or unavailable. Highways, county roads and bridges will be affected during construction and maintenance of pipeline. Again, replacement costs will be provided through property tax revenues.
3. Serious environmental threat. Liquid carbon dioxide is a threat to shallow aquifers utilized by local utility companies, as well, the private wells of rural property owners. Water supplies will be burdened due to the large amount of water required to capture and transport of CO₂.

Individual property ownership should be upheld, not ignored due to power and influence of large corporations.
