Width of a required side yard shall be measured in such a manner that the yard established is a strip of the minimum width required by the district regulations with its inner edge parallel with the side lot line.

Yard, Rear. A yard extending across the rear of the lot between inner side yard lines. In the case of through lots and corner lots, there will be no rear yards, but only front and side yards.

Depth of a required rear yard shall be measured in such a manner that the yard established is a strip of the minimum width required by the district regulations with its inner edge parallel with the rear lot line.

Yard, Special. A yard behind any required yard adjacent to a public street, required to perform the same functions as a side or rear yard, but adjacent to a lot line so placed to perform like functions as a side yard, but next to a lot line so located or oriented that neither the term side yard nor the term rear yard clearly applies. In such cases, the administrative official shall require a yard with minimum dimensions as generally required for a side yard or a rear yard in the district, determining which shall apply by the relation of the portion of the lot on which the yard is to be placed to the adjoining lot(s), with due consideration to the orientation and placement of structures and buildable areas thereon.
