Docket Number: HP24-001 Last Name: Rentschler First Name: Clayton Company:

Retired Address: [REDACTED] City: Flandreau State: SD Zip: 57028 Phone: [REDACTED]

[REDACTED] Email: [REDACTED] Comments: One and many

concerns I have are the waterfowl protection areas that will be affected. When a rupture occurs and settles over large and small bodies of water what will the effect be? CO2 and water equals carbonic acid. Fish and other species will be devastated. What plans are put in place by Summit to recoup from such a disaster? This most certainly impairs the health, safety and welfare of our wildlife inhabitants and most certainly poses a threat of serious injury to the waterfowl environment Sent from my iPhone
