To Whom It May Concern,

As a dedicated landowner and taxpayer in Lincoln County, I am deeply alarmed by the blatant lack of transparency surrounding this project and Summit's disregard for our community. It is outrageous that Summit is attempting to preempt our local ordinances through the Public Utilities Commission, effectively undermining landowners' rights. This maneuver reveals a troubling intention on Summit's part to sidestep the laws and regulations designed to protect our community.

The construction of this pipeline is not just an infrastructure project; it poses a significant threat to the very fabric of our community and the environment we cherish. It endangers our residents' health, safety, and welfare and disrupts our region's orderly economic development. The overwhelming majority of local governing bodies have strongly opposed both Summit as a company and their proposed pipeline.

Given these serious concerns, it is abundantly clear that Summit is not a reputable company with which we can safely do business. Summit's application must be denied. Our community deserves better—let's ensure our voices are heard, and our rights are protected.

Sincerely,
Dana R. Bosma
