Subject Docket HP22-001 Summit Pipeline

I vehemently object to this Summit pipeline for many reasons: seizure of the land - squandering public water - safety of pipeline - no insurance to cover liability - eminent domain does not apply - crop production loss - decrease in land values - a problematic dump site - a DAPL issue - issues with our Indian Tribes - my tax dollars subsidizing this(credits) - misuse of natural resources - (prime farm land that can never be reclaimed again) - ginormous grided tile that will be compromised - by a private company for their financial gain while the landowner endures the damage - all the above and more of which Summit does not give a care nor are they concerned about.

PLEASE make a wise decision here for the people of South Dakota and all the midwest and DENY this permit This is a boondoggle like never seen in this country before. And it will affect generations for absolutely decades. Please get truthful answers to the hard questions. This is so untested and we are not guinea pigs. We have worked hard all our lives for our land and don't wish it seized. We have a right to not have this pipeline rammed down our throat. I trust you will do the right thing here and DENY. jkg
