Dear Gary Hanson:

We're writing to you in regard to the application by SCS Carbon Transport LLC for a permit to construct a Carbon Dioxide Transmission Pipeline. We're hoping you + the PUC will deny them the permit. It will benefit them only. We sit above the aquifer in Brookings. What will happen to the water supply for us and the city of Brookings + town of Aurora if the pipeline ruptures? What about the agricultural land in South Dakota if it ruptures? This is how we make our living along with many other South Dakotan farmers. We don't want it in our backyard + we don't think you would want it in your backyard either. Is it worth the possible risk of a rupture when it won't benefit South Dakota? We don't think so. Please vote NO to giving them a permit.

Sincerely,

Keith Allison + Betty Allison
