Dear SD PUC Commissioners:

Thank you for this opportunity to address you about Summit Carbon Solutions. I ask that you would deny the application as they are not willing to abide by local county zoning ordinances. The county level of governing is the foundation of our state & federal constitution for establishing laws & rules &/or regulations. In addition to not being willing to comply with local zoning ordinances, there are many questions with water, electricity - both critical for individual agriculture business. Both of these resources in SD are limited and for the amount both of these are required to turn the gaseous CO2 into a liquid will cause shortages in both areas.

They have been denied by this body, the SD Supreme Court, & the citizens of SD with the defeat of RL 20. If they cannot comply, they must be denied.

Respectfully,
Linda Pedersen
