**Subject:** [EXT] Summit Carbon pipeline application

We are an original homestead farming operation of only 400 acres. Our son does most of the farming and livestock operation. Our grandson recently graduated from high school and also has a small investment in this farming operation. Six generations.

The proposed pipeline is one and a half miles from my home putting us in the kill zone. This could change and Summit would then try to get an easement.

We are also original investors in the Wentworth ethanol company and live six miles away.

We are asking you to deny Summit's application for so many reasons--safety, devaluation of property, liability insurance no longer available, the threat of gaining eminent domain through the federal government or state, life long easements that prohibit the use of your own land, yet still paying property taxes, unproven scientific benefits, and because it is the right thing to do.

Duane and Thresea Wright
