Electric service to new home

Mr. Drong,

During a recent telephone conversation in which yourself, Steve Wegman of the PUC, and I participated, Otter Tail Power Company offered the following option in order to provide electric service to your new home.

Otter Tail Power Company will charge \$12,870.00 (7,150 feet X \$1.80 per foot) as an aid to construction to provide electric service to your new home.

We will allow a four-year development period for the other lots that you own. Should other homes be built in the next four years, we will review the electric revenue from your home and any others that are built.

Should the electric revenue from your home and any others constructed in this area meet or exceed \$6532.50 per year for four years (\$544 per month), no further payment will be necessary.

A handwritten signature in black ink, appearing to read "Kevin Kouba".
