Dear Public Utilities Commission

I just received a letter from Golden West. They sent it with postage due so I had to pay the postage to receive my letter. Looks like Golden West likes to nickel and dime people anyway they can, won't even pay their own postage.

I'm really beginning to question this Northrup's ethics? She wants a dismissal because we can't reach an agreement. Well you have to make communication in some form to make a settlement? I faxed you the letter I sent Golden West but no letter, fax, or call came back! The only time she wants to talk is lawyer to lawyer to run up attorney fees so Golden West pays her..... and she can make an economic hardship on us.

We had Pat Gimsback hired to draw an easement for approximately 300ft from the Golden West pedestal

that supplies service to the schoolhouse. This easement would be just like the one we gave Black Hills Power to service the schoolhouse. It's real simple from the supply line to the building to be serviced. She would not respond to this instead she repeated the same papers three times on easements in all kinds of areas instead of just the specific area that needed service.

The whole issue boils down to Mr. Schroeder at the Hot Springs office along with some profanity informed us we weren't getting any phone! Since my last letter I would like you to know what we are requesting when the Corp of Engineers was doing cleanup at Igloo at this very same pedestal Golden West supplied service to them. There is a line in place from pedestal to schoolhouse so they could supply us service just like they did the U.S. Government. This could be utilized rather than fight with Northrup and her way or

No Way Casement!

At the present time we are calving and its well over a mile to land line so contact me by cellphone at 890-7973 about available hearing dates. Our son is getting married in May so since we have waited this long please contact me before you set one as I want to attend. Thank you for your attention to this matter

Sincerely
Cindy Brunson
